

# Decorative & Preservative Coatings

Using state of the art technology TFS is able to provide a range of decorative and preservative coatings that include environmentally friendly water based paint, stains, oils and UV cured acrylics suitable for a diverse range of substrate materials. Potential applications are only limited by your imagination – in both interior and exterior environments. From UV cured lacquers for the furniture industry to bold RAL colours for doors and the retail sector

Factory applied decorative coatings deliver a level of finish quality that is simply not attainable when done post installation. TFS coatings are consistently applied using BS EN ISO9001:2015 quality assured processes. Time is saved with the speed and ease of installation. Finishes are not contaminated by dust, reducing costly delays.

TFS also offer a range of preservative coatings, including SiOO:X, a natural protective solution.

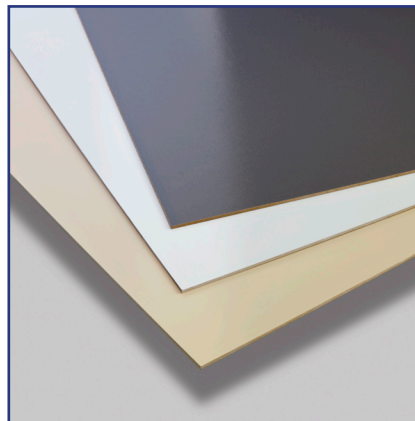

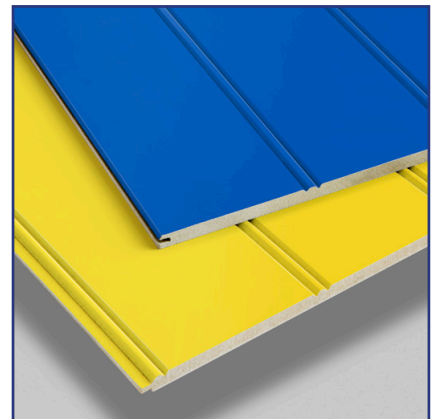

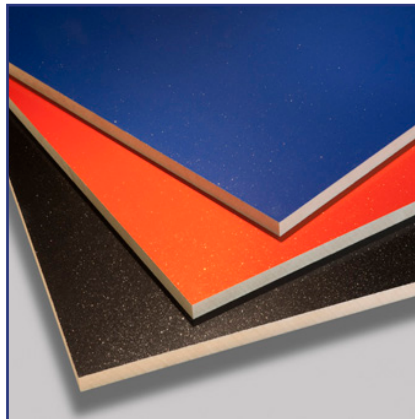

## Key Product Features

- ✓ Factory applied consistent finish, ready for use
