

MasterFlow

THE NAME YOU CAN TRUST

PRESS FITTINGS PRICE LIST

MasterFlow is the name you can trust for plumbing and heating fittings and accessories.

Over the years, MasterFlow has prided itself on supplying a comprehensive portfolio of quality products to the retail and independent markets. The range includes the 'M' profile 316 stainless steel press fittings and 'M' profile copper fittings for heating, water and gas applications.

'M' Press is the user friendly plumbing solution offering the advantage of flame-free installation. This saves on time and

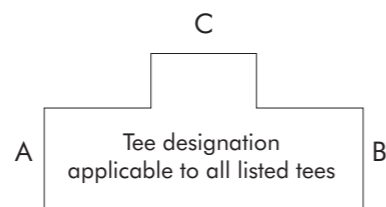

money whilst eliminating the need for solder, adhesives or additional jointing materials. With this, the range comes fully backed by manufacturer's guarantees and relevant industry approvals, including WRAS.

This price list provides all key details including product specifications, installation instructions and basic technical information. For more information on the product range, please visit masterflow.uk.com or contact your MasterFlow Area Sales Manager.

Features and benefits

- WRAS approved.
- Quick installation.
- No need for flame.
- Marked for full traceability.
- Suitable for HVAC and hot and cold drinking water applications.
- For use with hard, half-hard and soft copper tube manufactured in accordance with EN 1057.
- Specially designed O-ring with leak detection indicators (up to 54 mm).
- Highly resistant to corrosion and oxidation with anti-microbial properties.
- Full product guarantee.

Applications & Technical Information

Copper Fittings

Applications	HVAC and hot & cold drinking water applications
Available sizes	15 mm to 76 mm
Wall thickness	Copper fittings: minimum 1.20 mm Brass fittings: minimum 1.40 mm
Operating parameters	Hydrostatic water pressure up to 16 bar
Materials	Copper fittings: CW024A Brass fittings: CW511L
O-ring	EPDM (Black) Ethylene rubber
Operating temperatures	-35 °C to 110 °C

Features and benefits

- Quick installation.
- No need for flame.
- Marked for full traceability.
- For use with hard, half-hard and soft copper tube manufactured in accordance with EN 1057.
- Incorporates a high quality HNBR (Hydrogenated Nitrile Butadiene Rubber) O-ring with no pre-press leak indicator for safety reasons.
- Suitable for natural gas / LPG and compressed air applications.
- Manufactured to and comply with the requirements of the following standards:
 - BS8537: 2010 copper and copper alloys. Plumbing fittings – Specification for press ends of plumbing fittings for use with copper tubes.
 - European draft standard prEN1254-7 copper and copper alloys. Plumbing fittings – Part 7 fittings with press ends for metallic tubes.

Applications & Technical Information

Gas Copper Fittings	
Applications	Natural gas, LPG and compressed air applications.
Available sizes	15 mm to 76 mm
Operating parameters	Maximum operating pressure up to 5 bar
Materials	Copper fittings: CW024A Brass fittings: CW511L
O-ring	Yellow (no leak before press indicator), HNBR (Hydrogenated Nitrile Butadiene Rubber)
Operating temperatures	-20 °C to 70 °C

Features and benefits

- WRAS approved.
- Quick installation.
- No need for flame.
- Marked for full traceability.
- Suitable for HVAC and hot and cold drinking water applications.
- Manufactured from stainless steel no 1.4404 (AISI 316L).
- Specially designed O-ring with leak detection indicators (up to 54mm).
- M Press Inox tube system available using precision steel tubes according to EN 10312.
- Thread fittings ISO7 internal Rp series parallel and external R Series taper.

Stainless steel no 1.4404 (AISI 316L)

- Hygienic making it suitable for food and pharmaceutical industry applications.
- Aesthetic finish, no need for additional painting or external protection.
- Minimal frictional losses provide faster fluid flow rates.
- Lower heat conduction in comparison to alternative materials.
- Use of molybdenum results in outstanding performance in chlorinated environments.
- Resistance to oxidation up to temperatures of 900 °C.
- Excellent mechanical and deformation resistance at high temperatures.

Applications & Technical Information

Stainless Steel Fittings

Applications	HVAC and hot & cold drinking water applications
Available Sizes	15 to 108 mm Thickness: 1.65 mm for diameters 15 mm to 54 mm 2 mm for diameters 76 mm to 108 mm
Operating parameters	Hydrostatic water pressure up to 16 bar
Material	Stainless Steel no 1.4404 (AISI 316L)

Black O-Ring

Applications	Hot water, heating, fire protection and compressed air (oil-free) applications
Operating temperature	-20 °C to 110 °C
Material	EPDM (Black) Ethylene rubber

Green O-Ring

Applications	Oils, hydrocarbons (except diesel), solar power installations, compressed air
Operating temperature	-20 °C to 200 °C
Material	FKM (Green) Fluoroelastomer rubber

For non stock items please contact your MasterFlow ASM to discuss specific project requirements and timescales.

Installation Instructions: All Ranges

1. Cut tube at right angles to length.

2. Deburr tube both internally and externally to prevent damage to the fitting seal on assembly.

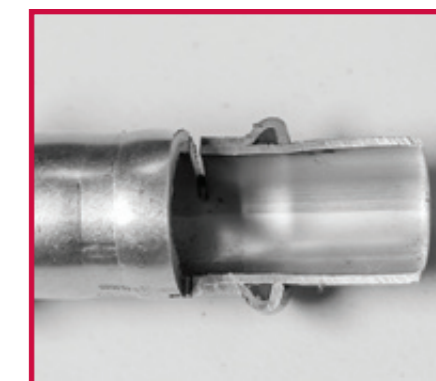

3. Ensure that the fitting O-ring is seated correctly. Do not use oil or grease.

4. Rotate the tube and fully locate tube into the fitting and mark as shown for reference.

5. Place the correct press fitting jaw into the machine and insert the fastening bolt. Open the jaw at right angles to the fitting and activate the machine to pressfit.

6. Correctly pressed fitting.
