

Welcome to

Engineering Specialists
to the Food, Beverage & Packaging Industries

A Total Solution

Combining many years of experience and technical skills gained in the food, beverage and packaging industries, Colwall Conveyor Systems (CCS) provide material handling solutions and engineering services to both O.E.M.'s and manufacturers to suit individual requirements.

From a simple handling solution to a complete automated conveying system including controls and software – from concept to completion.

CCS Conveyor Systems

Colwall Conveyor Systems (CCS) manufactures and installs a wide range of conveyor solutions to meet customer's individual requirements. From single or multiple conveyors for integration into existing machinery lines, through to complete fully automated conveying systems including controls and software.

Since we design and fabricate in-house, we can meet customer's exact needs, constructing conveyors from either stainless steel or painted mild steel utilising the latest modular plastic components to create easy to maintain conveying systems.

CCS has provided conveyor systems world-wide involving:-

- Bottles (plastic & glass), Cans, Cartons & Trays (cardboard & shrinkwrap), Pallets; Plastic Crates; Kegs; Foodstuffs, Components; etc.
- Integration of all types of conveyors & other OEM equipment.
- Conveyor lines - upgrades - retro fit - relocation
- Re-installations - including de-commissioning, disconnection, dismantling, relocation or disposal.

CCS can provide a total solution that includes full electrical and mechanical installation supported by full project management to current Health & Safety regulations.

CCS Services

CCS provide comprehensive engineering support to customers across many sectors of industry with our core experience in the food, beverage and packaging industries.

From complete turnkey projects through to engineering solutions CCS offers comprehensive services in:-

- ENGINEERING AND CAD DESIGN
- MANUFACTURING & FABRICATION
- EQUIPMENT - UPGRADES - RETRO FIT - RELOCATION

CCS design bespoke engineered solutions to meet individual customer needs, manufacturing, fabricating and assembling equipment that supports a wide range of applications within the industries served.

Fabrications are primarily in food quality stainless steel, although other materials are used such as aluminium and painted mild steel. Equipment includes:-

- Retro fitted dry running chains
- Guide rail modifications and upgrades
- Access platforms, stairs & stepovers
- Change part storage and product security solutions.

We offer technical advice and support through our engineering capabilities and are flexible enough to meet your individual deadlines.

Installation Services

CCS have built up a vast wealth of installation knowledge and experience in all aspects of conveying, packaging equipment and automated systems across a broad spectrum of industries.

After Sales Service

CCS are able to offer full maintenance support for your conveyor systems.

CCS is committed to providing continual customer support, which extends long after projects and equipment have been delivered, installed and commissioned.
