Security Enclosure

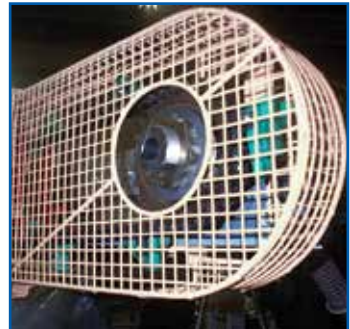

Bridge Safety Mesh

Air Con Guard

Window Guard

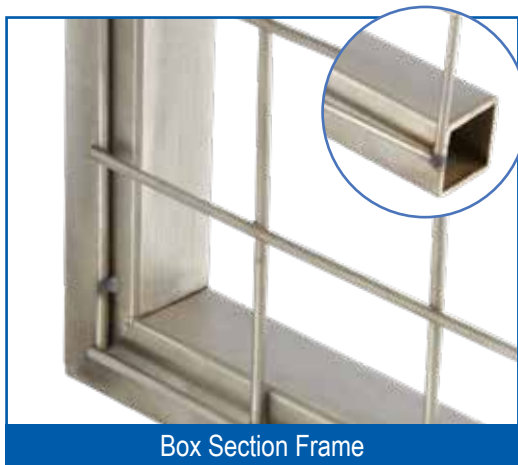

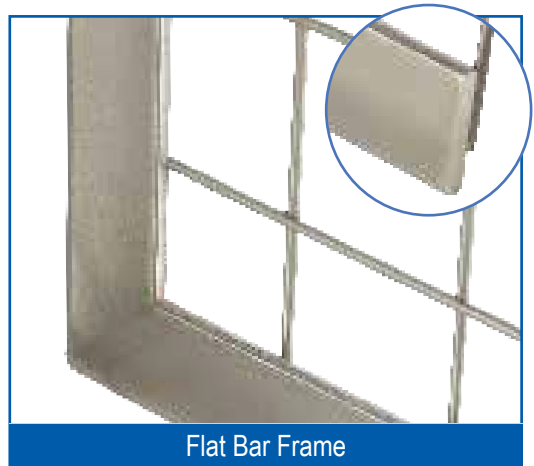

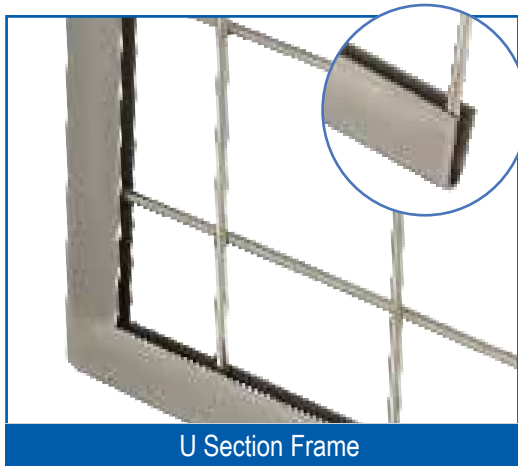

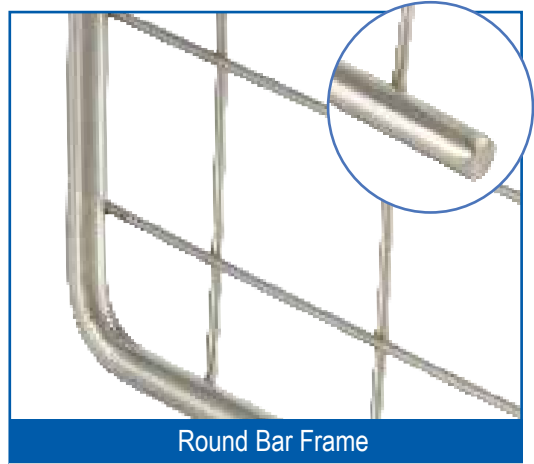

Drive Guard

FRAMED MESH

Strengthening can be achieved by the addition of frames and integral supports to mesh panels. Framing can also be added in order to achieve a 'safe edge' when used in areas with high pedestrian traffic e.g. balustrade infills and pedestrian barriers.

Examples of framed mesh are highlighted here including Round Bar, U Section, Flat Bar, Box Section & Angle Section.

INFILL PANELS

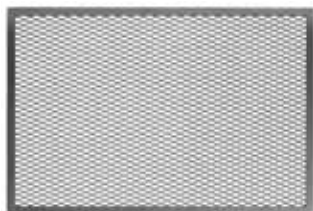

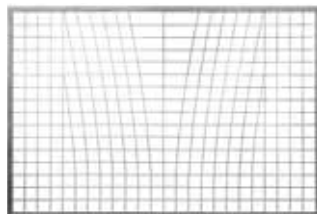

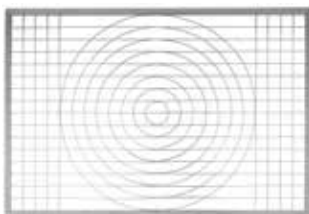

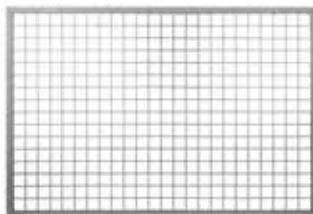

Whatever your infill requirements, we can provide top quality products every time. We not only manufacture mesh panels but can also cut and nibble panels to size and frame including raked panels to suit slopes and stairs.

Caged Footbridge

Balustrade Infill

- **Mild Steel**
- **Galvanised**
- **Powder Coated**
- **Stainless Steel**

Whether your infill requirement is for balustrades, stairways, parapets, etc. we can provide what you're looking for at a competitive price whilst never compromising on quality.

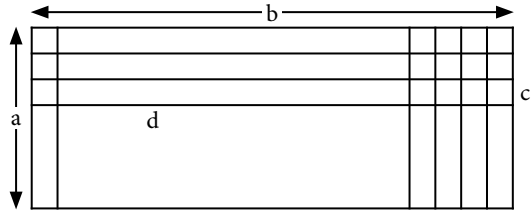

Bespoke panels are also available in perforated and expanded metals. If you have an application that requires a unique specification we are always happy to assist.

Where "standard" mesh options do not meet requirements, WMF are perfectly placed with our range of jigs and tooling to manually manufacture unique specifications upon request.

Manual and automated manufacturing methods along with our flexible approach give us the best of both worlds to offer small and larger batch quantities competitively priced.

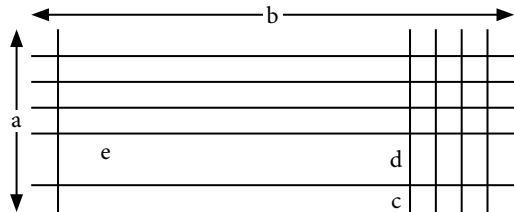

When ordering panels with flush edges please specify:

- a) Width of panel
- b) Length of panel
- c) Mesh size on width
- d) Mesh size on length
- e) Gauge of wire
- f) Finish

When ordering panels with overhangs please specify:

- a) Overall width of panel including overhangs
- b) Overall length of panel including overhangs
- c) Length of overhangs required
- d) Mesh size on width
- e) Mesh size on length
- f) Gauge of wire
- g) Finish

As well as carbon, we are able to manufacture mesh from other metals including mild steel, stainless steel and nickel alloys. Please visit www.wiremeshfabs.co.uk and download our cut to size order form today.

STAINLESS STEEL STOCK MESH

Advantages of stainless steel Welded Mesh?

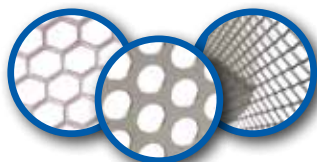

Welded Mesh is manufactured by laying crosswires at 90° to the longitudinal wires and resistance welding at every intersection. Using stainless steel has many advantages. Excellent corrosion resistance, non-magnetic properties, high/low temperature resistance and life-cycle cost benefits.
