DESCRIPTION

Since the late 1960's Atkinson Equipment have been making the Atkinson Tankmaster and it is still known as 'THE' appliance of choice for monitoring the contents of oil tanks around the country. Designed to fit onto steel or plastic oil heating storage tanks. For use with oil central heating systems, it eliminates the need for a separate gate valve, level gauge, filter and a number of pipe fittings.

The Atkinson Tankmaster Valve comprises the following;

- PVC Sight Gauge
- Pull-To-Read valve to isolate flow into tube during rest
- On/Off Handwheel
- Eutectic Solder Firevalve built into handwheel
- 10mm Brass Compression Fitting Outlet
- 52 Micron Nylon Filter (Replaceable)
- Reversible body for left or right hand exit of compression fitting
- Standoff Clip for mounting top of tube to top of tank
- 1/2" BSP Male Tank / Extension Fitting

Tankmaster Sight Tubes are supplied with a white UPVC support shield on models up to 5ft and Aluminium support shield on 6ft+ models. Available sizes: 4ft 6", 5ft, 6ft, 8ft, 9ft, 10ft.

FEATURES

- Control valve to turn on/off oil supply
- Intergral filter to ensure clean oil is passed through the line
- Sight tube to allow contents level inspection
- Self-closing hand wheel to isolate oil supply
