audit

# Working with you...

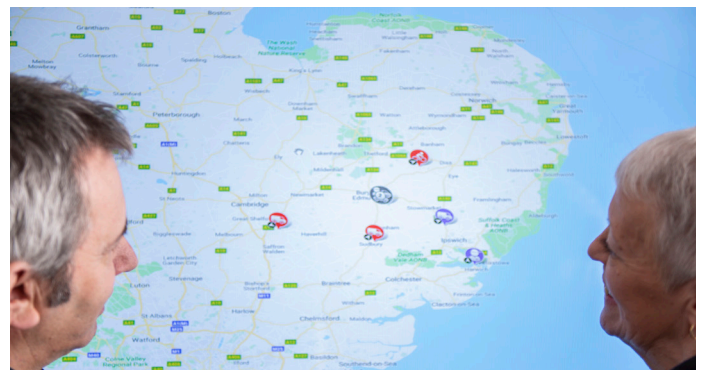

## ...to ensure your compressed air system is safe and legal

A compressed air system stores compressed air at pressure and if not maintained correctly can cause serious harm to people and property.

*"Under the Pressure Systems Safety Regulations 2000, users and owners of pressure systems are required to demonstrate that they know the safe operating limits of their systems, and that they are safe under those conditions. They need to ensure that a suitable*

*written scheme of examination is in place before the system is operated."* Published by the Health and Safety Executive INDG178(rev2).

We can ensure you have a Written Scheme of Examination in place and to assist in keeping it up to date.

### SERVICE 24x7

Service and breakdown cover

### PIPEWORK

Design and installation of compressed air pipework

### AIR QUALITY

Consultancy and breathing air quality testing

### LEGAL

Written Schemes of Examinations and Air Receiver Inspections

### HIRE

Short and long term hire equipment available

### COMPRESSORS

British manufacturer of efficient air compressors

### AIR TREATMENT

Dryers and filters to improve air quality

### ENERGY SAVING

Consultancy and solutions

air energy audit

## ...to reduce your operating costs

Our team actively work closely with you to reduce your running and servicing costs. Having invested into the latest scadar compressed air data loggers, we can monitor how your compressors are running and can advise on how you can save money:

**Reducing compressed air leaks** in pipework will reduce compressor running costs, wear and tear and servicing costs.

**Running hours analysis** optimises your compressed air reliability and servicing costs.

**Lowering the operating pressure** of your compressors reduces your electrical running costs.

**Compressor management** optimises your compressed air electrical costs and servicing costs.

**Variable speed technology** can offer significant paybacks sometimes in less than a year with new warranties offering reduced breakdown costs.

## Benefits of working with Avelair

✓ **24/7 breakdown response**

There for you, when you need us

✓ **Planned maintenance contracts**

Competitively priced and offering reliability to your equipment

✓ **Factory trained engineers**

Professional and reliable service

✓ **FGAS certified**

Legal requirement to work with refrigerant gases

✓ **ISO 9001 certified with British Standards Institute**

Professional and ever improving service

✓ **Safecontractor approved**

High level of health and safety management

✓ **British Compressed Air Society active member**

Working in line with the approved codes of practice

24·7

# Avelair

compressed air solutions

Our focus is to deliver a professional and personal service along with reliable and efficient compressed air equipment.

Our team actively work with you to reduce your compressed air running and serving costs, long term. We are also the UK manufacturer of the Avelair rotary screw air compressor range which are offered with an unrivalled 8 year performance+ airend warranty.

Established in 1993.
