

'BENCHTOP RANGE' Ultrasonic Cleaning Baths

BENEFITS

- Fast and effective precision cleaning.
- Removes the need for expensive solvents.
- Minimises operator involvement during cleaning.
- On-line fast cleaning of complex components.
- Easy and safe for the operator to use.

FEATURES

- Digital time and temperature control.
- Load variable auto tune and soft start function.
- Low liquid level safety switch.
- Easy clean stainless steel construction.

| Model | External Dimensions | Basket Dimensions |
|-----------|-------------------------|------------------------|
| | Length x Width x Height | Length x Width x Depth |
| 2.5 Litre | 340 x 150 x 250 mm | 230 x 70 x 55 mm |
| 5 Litre | 340 x 190 x 300 mm | 240 x 105 x 110 mm |
| 10 Litre | 340 x 280 x 350 mm | 230 x 180 x 140 mm |
| 15 Litre | 370 x 340 x 360 mm | 265 x 240 x 150 mm |
| 20 Litre | 550 x 340 x 310 mm | 420 x 240 x 120 mm |

The '**BENCHTOP RANGE**' of ultrasonic cleaning baths from Townson and Mercer offer the ability to rapidly clean all types of materials, components and products. Ultrasonic cleaning is now established as one of the best methods for cleaning precision components and assemblies giving many advantages over time consuming manual methods.

The baths are constructed in Stainless Steel and are equally at home in laboratories, machine shops, and maintenance departments.

The digital touch control pad allows both temperature and cleaning time to be easily set and displayed, and sensors within the control systems protect against low fluid levels and over temperature conditions.

The power of ultrasonics, used in conjunction with our range of water based cleaning solutions means that the need for hazardous and expensive solvent based cleaners can be eliminated.

In accordance with our policy of continual improvement in design we reserve the right to depart from details in this publication without prior notice.
