

'CONSUMABLES'

Aluminium Dishes

- Inexpensive to use.
- Ideal for solids testing.
- Protects balance pans.
- Suitable for temperatures up to 450°C.
- Can be used in pairs for covered samples.
- Non-static.
- Three sizes available.

These inexpensive pure aluminium dishes are suitable for the process/testing of both wet and dry samples.

They enable wet solids testing from mixtures and emulsions by the loss of weight method without the need of time consuming scrubbing of other more expensive dishes - use once and discard.

Unlike silica, glass and porcelain the Townson + Mercer expendable aluminium dishes are unaffected by thermal shock and is probably why they are being used by our customers in ever greater quantities for any process where a quantity of sample is required to be weighed, tested, cooled or evaporated - in fact explored in any way.

SPECIFICATIONS		
Cat No.	Description	Qty. (approx)
04900322	65 mm dia., 10 mm deep 0.2 mm thick with flange	200 per box
04900319	57 mm dia., 10 mm deep, 0.2 mm thick with flange	250 per box
04900304	42 mm dia., 5 mm deep 0.2 mm thick with flange	500 per box
