How to choose the right software supplier

Below is a checklist of the key factors to consider when choosing a new software supplier

- [ ] Do they have the knowledge and expertise to understand the challenges you face?

- [ ] Do they have the capacity and technical support to deliver what you want, and to your specified budget and timeframe?

- [ ] Do their solutions fit with your existing business processes and systems?

- [ ] Are they experienced with developing Wholesale Business Systems like ERP and WMS?

- [ ] Will their solutions enhance your customer services?

- [ ] Are their solutions optimised for different devices – desktop, mobile and tablet?

- [ ] Can they give you a demonstration?

- [ ] If you are just extending your existing infrastructures, can they effectively leverage what you have and make it work better?

- [ ] Do they provide digital systems, such as ecommerce or Product Information Management?

- [ ] Are they able to support business and technology collaboration to help prioritise workloads, improve efficiency and reduce bottleneck across the business?

- [ ] Can they help you advance your business goals, not just your technical infrastructure?

BCP can tick all these boxes!
