It has been confirmed by the **HIGG MATERIAL SUSTAINABILITY INDEX (MSI)** that upcycled yarns generously outperform virgin equivalent yarns across all sustainability metrics.

STOPPING WASTE AT THE SOURCE!

We use textile waste as a raw material resource, diverting it from landfill and incineration. We become less dependent on virgin materials and we save water, energy, CO₂ emissions and toxic materials.

UPCYCLED YARN is free of hazardous substances. It exceeds ZDHC and REACH Compliance. These statements have been calculated through LCA work, verified by Universidad de Valencia and UNESCO.

ENVIRONMENTAL SAVINGS AND BENEFITS IN 2018

- WATER.** Saved over 43.4 billion litres.
- TOXIC CHEMICALS.** Saved over 3.2 million kilos.
- TEXTILE WASTE.** Upcycled over 2.9 million kilos.
- RPET.** Upcycled over 4.3 million bottles.
- CO₂ EMISSIONS.** Saved over 61 million kilos.
- ENERGY.** Saved over 157 million kWh.
- LANDFILL:** Saved over 7.3 million square metres.

PREMIUM PRINTED COOLMAX SOCKS

NON SMELLING SOCKS WITH ACTIVE ODOR CONTROL.
Moves perspiration away from the feet with moisture wicking properties.

- **ELASTICATED RIBBING**
For additional support and maximum comfort.
- **HIGH QUALITY KNIT**
With a 2 year guarantee.
- **FEATHER LIGHT**
The most comfortable socks on the planet.
- **ANTIMICROBIAL / HYDROPHOBIC YARN**
Absorbs little fluid and dries quickly. Keeps socks smelling fresh.
- **COMFORT SOLE**
Dense cushioned sole for maximum comfort and less fatigue.

Composition:
90% COOLMAX for comfort and breathability,
8% polyester for strength, 2% elastane for stretch.

Printed Coolmax Crew Socks in a Sliding box

Polyester socks will make feet sweaty and smelly because they will not allow for sweat to evaporate. They can quickly cause foot odor (bromhidrosis). Coolmax socks are the preferred choice because they keep the perspiration away from the feet. Choose your socks wisely with Kingly's range of COOLMAX socks.
