

storage lockers

elite range of products

Standard Door Colour Options

All lockers supplied with mid grey carcass

These steel coloured lockers are manufactured to the highest specification.

Lockers are welded and riveted in construction. Semi concealed hinges are welded to the door and riveted to the frame, allowing easy replacement of damaged doors. The doors are mounted within a rebated frame to enhance compartment security. Selected doors are reinforced with profiled steel sections.

The carcass incorporates nesting holes on all sides and a return flange at the base for extra strength and to reduce floor damage. Lockers are manufactured using CR4 and bright galvanised steel (internal components only). Material thickness specification 0.9mm doors and frame, 0.7mm carcass and shelves. Painted components are epoxy polyester powder coated prior to assembly to ensure all surfaces are protected. Nested lockers are manufactured with common sides, offering savings. The materials used classifies this locker as a fire retardant product meeting the BS Class '0' rating.

 UK manufactured products.

elite GUARD

Anti-bacterial powder coating is an effective solution to fight against bacterial contamination for the life of the coating. Independently tested and found to be 99.9% effective against MRSA and E-coli. Also shown to exhibit zero growth for fungi and moulds.

elite GUARD offers the healthcare, food and those users requiring stringent hygienic environments an effective secondary support to existing cleaning practices in the fight against bacterial contamination.
