

## Overview

The Alto Scaffmate One is a versatile all-aluminum access platform to allow scaffolders to safely erect and dismantle scaffolding from a guard railed position.

Usable at any point along the guardrail and with a 50 mm adjustable foot, the Alto Scaffmate One provides a convenient, secure, slip resistant one metre high platform, giving ideal additional reach during the process of erection and dismantling of scaffolding in a safe and compliant manner.

Manufactured in the UK and weighing only 6kg, the Alto Scaffmate One represents the ideal solution for scaffolders seeking a safe, cost-effective 1 metre step-up device. The Alto Scaffmate One is to be used in conjunction with a proprietary and reliable personal fall arrest device.

## Specification

<b>WEIGHT</b>	6 KG
<b>DIMENSIONS</b>	Folded flat – 1.0m x 0.25m Unfolded (max) 1.0m x 0.74m
<b>OPERATING HEIGHT</b>	1.0m
<b>HEIGHT ADJUSTMENT</b>	50mm
<b>KEY FEATURES</b>	<ul style="list-style-type: none"> <li>Quick release spring locks to all connections</li> <li>Durable corrosion resistant construction</li> <li>Slip resistant platform and ladder rungs</li> <li>Adjustable feet for uneven surfaces</li> </ul>

## Key Features

- Aluminium construction for light weight and easy handling.
- Ladder folds and latches flat for ease of carrying and storage.
- Quick release auto-latch brace hooks lock onto the scaffolding guardrail and prevent unintentional removal.
- Swivel feet accommodate minor surface imperfections and provide a secure footing
- 50mm adjustment in ladder stiles provide a level platform for both system and tube & fitting scaffolds
- Slip resistant all aluminium platform with generous 540mm x 405mm area gives a safe working platform
- Platform automatically latches in open and closed positions for secure and safe utilisation.
