

Med Isola

Aluminium Framed Terrace Cover

Outside
Structure
SoLutions 

The Med Isola is the latest terrace cover in the Med range. Joining the Elite and Viva, these structures are able to be installed completely free-standing or wall mounted at the rear. Available in multiple size combinations, the Med Isola brings continental style to the UK canopy market.

The fabric is held under constant tension laterally and the unique design ensures that all rain water runs neatly off the roof.

Available with manual or electric operation the Med Isola is simple to operate.

- Available as a completely free standing structure, or can be wall mounted for ultimate flexibility.
- High quality fabric is designed and manufactured for use on external structures. Waterproof, fire retardant and strong.
- The aluminium structure is powder coated to give clean contemporary feel.
- The Med Isola provides shelter from the rain and shading from the sun but can be fully retracted if desired to enable you to take full advantage of the good weather, leaving an unobtrusive framework.

Operation

Manual operation via crank handle and gear box (single module only)

or

Electric Somfy tubular motor housed within the drive bar with remote control handset or wall mounted rocker switch.
