OFFICIAL DISTRIBUTOR

213 CLASSIC COLOURS ▪ 490 RAL EFFECT COLOURS ▪ 1825 RAL DESIGN COLOURS ▪ RAL DIGITAL

RAL is more than just the Classic range

RAL defines and standardises colour for many industries, including interiors and architecture, industrial design and paint and powder coatings. **Discover more than just the Classic range with VeriVide, a UK RAL authorised distributor** →

RAL Design System plus

The CIELab based RAL Design System plus colour range comprises of 1,825 colours. Developed for architects and interior designers, RAL Design is the comprehensive range of colours for interior and decorative design. The colours are methodically arranged according to Hue (H), Lightness (L) and Chroma (C).

NEW

↑ RAL Design D8 guide

The RAL D8 box is the perfect studio companion as it contains eight fan decks, one for every hue with 230 colours per fan deck. Every colour has its own page which provides a larger colour area. Each page measures 3.2x10cm.

RAL Design D2 Plus guide

The RAL D2 Plus features all 1825 RAL Design colours in a user friendly fan guide format. Nine 2.5x2.5cm colours are displayed on every page and the guide comes with a protective box for storage. ↓

NEW RAL Design D3 Toolbook

The RAL D3 Toolbook offers the flexibility of removable colour chips contained in an easy to access ringbinder format. Each colour shade has 3 removable chips measuring 4.0 x 3.5cm.

The full RAL range available direct from the colour experts

RAL Plastic

RAL Plastic P1 Set

The RAL P1 Set contains 100 of the most popular RAL Classic colours on a polypropylene substrate. These colour standards measure 10.5 x 14.8 cm. They have three levels of thickness (0.3, 0.2 and 0.1cm), three surface textures (polished high gloss, two grades of rougher surface) as well as colour data and a protective case.

P1 set

P2 set

RAL Plastic P2 Set

The RAL P2 Set contains 200 of the most popular RAL Design colours on a polypropylene substrate. Like the RAL P1 plates these polypropylene colour standards measure 10.5 x 14.8 cm and have three levels of thickness and surface texture. 40 plates are transparent whereas the other 160 are opaque. All plates include colour data and the set comes with a protective case.

RAL Digital

RAL COLORCATCH NANO

The RAL COLORCATCH NANO colorimeter can measure up to 5 colours at one time, regardless of surface and material, and displays the corresponding RAL colour shade, with digital colour values. During the colour measurement, all non-dominating colour shades, shadows or dirt are eliminated automatically.

The colorimeter increases the image six-fold and accurately measures colour from the size of a few pixels. Providing RGB, L*a*b*, and CMYK values of the closest RAL colour as well as the reflectance values of most selected colour cards. It works with iOS and Android Apps to transfer the measured colour to an image in the app.

RAL Effect

RAL fulfils the wish for greater variety in colour design in the industrial sector with the RAL Effect range. RAL Effect combines 420 solid colours with 70 metallic colours that harmonise with the solids. It is the first collection from RAL to feature waterborne paint systems and no use of heavy metals such as lead, cadmium and chromates.

RAL Effect E1

The E1 box contains all 490 colours from the RAL EFFECT collection. The 420 solid colours (semi matt) are based on waterborne paint systems, the 70 metallic colours (high gloss) are manufactured using acrylic paints. Each Ral Effect Colour is in A6 format 10.5 X 14.8 cm, ideally for colour matching and quality control. The colours are placed in a convenient and protective case with format 49.0 x 26.0 x 17.5 cm.

RAL Effect E4 Guide

The RAL E4 fan deck contains 70 metallic colours from the RAL Effect range, displayed on individual pages with a large colour swatch measuring 5 x 13cm. Colours are manufactured using acrylic paints with a high gloss.

RAL Classic

The original RAL Classic colours are available as colour charts on semi matt or gloss coated paper.

RAL Classic Primary Standards Sets

The semi matt 840-HR Primary Standards and the high gloss 841-GL Primary Standards act as binding colour samples for colour matching and quality control. Each sheet displays the colours XYZ values, colour distance and reflectance curve information. The 840-HR features all 213 colours in the RAL Classic range and the 841-GL includes 196 of these classic colours. A protective box can purchased separately.

RAL 840-HR - semi matt finish
RAL 841-GL - gloss finish

RAL Classic K5 guide

Available in both gloss and semi matt finishes, the K5 guide has a large page for each colour measuring 5.0 x 15.0 cm. This fan deck comes with a hard back protective cover making it an ideal production tool or travel companion.
