

Pilling Assessment Viewer (PAV)

VeriVide are pleased to announce the launch of their new Pilling Assessment Viewer (PAV) for the textile market. This new PAV unit has been developed in conjunction with Technicare Services Ltd, and in accordance to EN ISO 12945 standards incorporating all 3 parts and adopting the following test methods...

Part 1: ICI Pilling Box Method. BS 5811

Part 2: Modified Martindale Method. SN 198 525

Part 3: Atlas random tumble method. ASTM D 3512-96

The versatile nature of the unit includes a recess for the modified Martindale specimen head. This enables the fabric to be assessed during the test procedure, whilst still mounted on the head.

If you would like to order the VeriVide PAV please complete the Product Order Code Table and contact our Sales Department.

Product Order Code

STYLE	LIGHT SOURCE		VOLTAGE	
	D65	CWF	230v	110v
PAV				

SIZE (MM)	WIDTH	HEIGHT	DEPTH
OVERALL	340	280	240
VIEWING AREA	340	165	240

For more information on lamps please refer to Data Sheet/pdf - Lamp Options.
For information on accessories please refer to Data Sheet/pdf - Accessories.

Other results of test methods that can be viewed include

- ◆ BS 5811:1986 Determination of the resistance to pilling and change of appearance of fabrics.
- ◆ ICI modified pill Box for snagging.
- ◆ Fleece appearance and surface change after washing.
- ◆ Other test methods as specified by several major retail outlets.

To optimise consistency of viewing conditions the unit comprises of electronic ballasts, and specially selected white reflectors. The standard light source supplied with the unit is the D65 "Artificial Daylight". Though, an option of CWF is available as specified by certain retailers.

The Pilling Assessment Viewer is sold as a complete unit. However, if you have your own specifications a tailored unit can be provided. For more information please contact our Sales Department or E-mail us at enquiries@verivide.com
