

MAVERICK

DO YOU FEEL THE  
**NEED** FOR **SPEED**

ARE PNEUMATIC ACTUATORS SLOWING YOU DOWN?

# PICK UP THE PACE WITH HIGH SPEED ELECTRIC ACTUATORS!

The sluggish response of pneumatic actuators can restrict production throughput and increasing air pressure to improve matters leads to damaging impacts with end stops.

Our low-friction, direct-drive electric actuators offer exceptional dynamic performance with closed-loop servo control of velocity and acceleration, which will allow you to get the most out of your process.
