

LIVE LONGER AND PROSPER

ARE PNEUMATIC ACTUATORS BLOWING OUT TOO EARLY?

RUN FOR YOUR LIFE WITH LONG LASTING ELECTRIC ACTUATORS!

Seals in pneumatic actuators can wear out quickly, especially in high cycle rate applications, leading to increased downtime and maintenance cost.

Our direct-drive linear motor electric actuators have very few contacting parts so offer lifetimes many times greater than air cylinders.

FIND OUT WHY ELECTRIC IS SUPERIOR TO PNEUMATIC:
