INNOVATORS OF PET CREMATION SOLUTIONS

As the pet crematorium sector grows in response to the need for sensitive and respectful management of pet remains, we are one of the worlds most trusted specialist at the forefront of innovation within the pet cremation industry.

The Inciner8 range of front-loading cremation systems are ideal for most domestic animals and, with simple, single person operation, they offer a practical, cost-effective option as the cremation unit of choice for pet cremation businesses.

Designed and manufactured in Britain to ISO 9001 accredited quality assurance standards, Inciner8's pet cremation systems have won Queen's Award for Enterprise, Innovation and International Trade.

All our pet cremation systems also offer complete peace of mind for you and your customers, with full maintenance and servicing packages provided by our expert engineers and include a comprehensive warranty.

PET CREMATION IS AN ATTRACTIVE COMMERCIAL OPPORTUNITY

All across the world, from South America to Europe, from the USA to China, pets are treasured members of the family. When they pass away, their owners want to send off their remains in a way that reflects the value of their lives and the memories they have given.

Many pet owners are looking for a pet cremation service that allows them to attend their pet's final journey in person. They want to pay their last respects and expect the same level of dignity and care a human member of the family would receive.

A pet cremation system from Inciner8 offers a service life of 15 years+, providing a very attractive pay-back period, along with great reliability and opportunities to grow your pet crematorium business.

WHAT INCINER8 CAN OFFER PET CREMATION BUSINESSES

At Inciner8, we are market leaders in pet cremation equipment and solutions, with a proven track record all around the world.

We manufacture all our pet cremation machines in-house to the highest standards, delivering and installing the equipment on site, and providing servicing and maintenance in any global location.

Our specialist pet crematorium team can offer you advice on the right machines and accessories to suit your needs and your business goals, along with general combustion and compliance expertise within the pet cremation industry.
