

SEASON'S GREETINGS

FROM

**A YULETIDE MESSAGE FROM OUR
MANAGING DIRECTOR, JON JONES:**

2021 has been a very busy and challenging year, but a successful and rewarding one as well.

We started the year with a move to our new premises and are pleased to have settled in well to our offices in Shannon Free Zone

Don't forget to add our address to your contacts:

**Cranage Veritas
Suite 301 Airport House
Shannon Free Zone
Shannon
V14N578
County Clare**

As businesses have opened back up, it's been great to get back out for face-to-face (mask-to-mask) meetings, following all safe social distancing measures. It's also been great to be able to get back to performing factory inspections, an essential part of the NRTL certification process.

I am still the only listed Local Technical Representative (LTR) in Ireland that can offer on site CB product testing. I look forward to assessing your in-situ device in 2022 and assisting you with your CB certification.

2021 saw Cranage Veritas launch a Design for Compliance consultancy service, a bespoke service for product designers and developers.

As you plan your 2022 product development, a reminder that support from us at the design stage could save you time and money.

We can help you ensure your approach to regulatory compliance is correct from the offset

It was also great to get back to showcasing our team and key services at major exhibitions, like the September 2021 Med Tech Expo (pictured) where we really enjoyed meeting new and existing customers.

Finally, I'd like to take this opportunity to wish you a happy, safe and compliant festive period. We look forward to working with you in 2022.

With Best Wishes
Jon Jones, MD
