

Wemico Protek

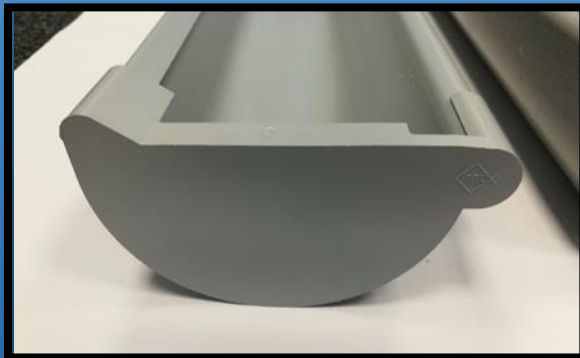

Engineered rainwater system

Wemico Protek

Engineered rainwater system

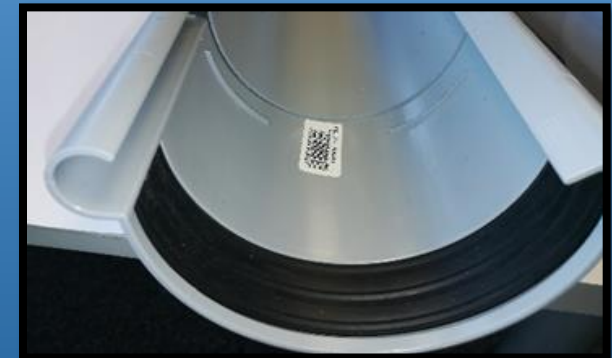

- The Group have been manufacturing plastic gutters since 1964.
- Wemico Protek rainwater products are one of the highest quality PVC system on the market.
- Protek gutter products are plasticizer free and do not become brittle.
- The high-quality raw material ensures the gutter impact resistance, UV resistance and dimensional stability.
- Extensive tests document these quality characteristics. (available on request)
- Environmental influences such as acid rain, deposits of flue gases and coastal locations have no effect on their performance because the products are acid and alkali resistant.
- All products are manufactured to stringent DIN standards. (DIN 19531 and DIN 4102, part 4 (class B1 for flame retardancy of building materials).
- To find the correct gutter size for your project we can assist in helping you calculate the m² values of the roof and floor areas.
- The rainwater run off calculation is in accordance with DIN EN 12056-3 and DIN 1986-100.
- Available in a large range of sizes and colours, half round or box gutters and with glued joints or built in high performance gaskets.

Aesthetically designed handed end caps

In built temperature scale when installing to account for thermal expansion and contraction.

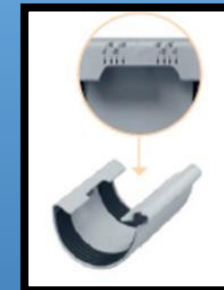

Wide jointing gaskets for superior performance

Half round rainwater system

Half round Gutter / 4m and 2m lengths	8 pieces - 100mm width		7 pieces - 125mm width		6 pieces - 150mm width		5- pieces - 180mm width
