FRIEDHELM LOH GROUP

Heat is the enemy of electronics

Reliably functioning enclosure climate control protects your investment and enables your installations to operate without interruption.

Trouble-free operation of a production line is in no small way dependent on the heat loads of the individual electronic components. A temperature increase of approx. 10 K (Kelvin) reduces the lifetime of these components by half and doubles the risk of failure.

Our exclusive offer for you

Maintenance for your enclosure cooling units by a Rittal service technician

Avoid costly downtimes and have your enclosure cooling units inspected at regular intervals by our qualified service technicians. By doing so, you can safeguard the availability of your production lines. On 365 days a year. On extremely favourable terms.

Fixed price*
per unit

95 €

Offer valid until
31 May 2019

Minimum of
10 cooling units

Travel to and
from the site

0 €
