

Harlequin BioBunds

Harlequin BioBund BioDiesel storage tanks have been developed especially for the safe, secure and environmentally responsible storage of BioDiesel. Fully banded and manufactured from a specialist, BioDiesel resistant polymer, BioBunds exceed all current and expected regulatory requirements.

Available in a choice of capacities from 1,400 litres to 10,000 litres and supplied complete with factory-fitted top outlet, BioBunds are ideal for the storage of BioDiesel at installations serving fixed combustion appliances and pedestal dispensing units, suitable for EN14214 & EN14213.
