1100 Gallons
Length 2230 mm
Width 2800 mm
Height 2420 mm

OFCERT No. 0642060236

The Titan FuelMaster, with its totally enclosed banded tank and integral pump and nozzle, is the perfect solution for those who need readily available fuel in a variety of locations.

The FuelMaster is compact and simple to install.* As it can be placed on a firm base at ground level, it is easily accessible for the clean and safe distribution of fuel.

The FuelMaster is manufactured from top quality polyethylene. Its robust, ribbed construction protects against accidental damage and will never rot or rust, even in the most exposed location. The FuelMaster tank is guaranteed for ten years and the pump and tank accessories for one year.

The tank comes fitted with either a factory-fitted mains electric or a battery powered pump (110volt, 12/24volt) concealed behind a lockable door for security. The nozzle, which comes complete with a hose and holster, enables clean and simple dispensing.

The FuelMaster has been independently tested and licensed by OFTEC to confirm that it complies with OFS T100 and the requirements of the Control of Pollution (Oil Storage) (England) Regulations 2001. FuelMaster should be installed by a suitably qualified technician with OFTEC registration or equivalent.

Unique extras fitted as standard

- The Watchman Plus complete proactive fuel monitoring system.
- The SpillStop overflow protection system.
- Fitted light inside dispensing cabinet for easy vision.

Optional extras

A wide range of pumps, flowmeters and management systems are also available with all Titan FuelMasters.

* All mains powered Titan FuelMasters must be connected and maintained by a suitably qualified electrician.
