

Project Summary

The need to open a European facility that would seamlessly serve EU clients with storage and material handling solutions.

Challenge

- The need to locate in Europe to provide dynamic movement and storage of client product
- The requirement to locate in close proximity to existing and long-established clients
- A tight timeframe to establish, resource and equip the plant to the exacting and best practice standards already operating in Flowstore's UK facility.

Why Flowstore (Belgium)

- Clients choose us for our ability to design bespoke solutions to meet exacting client needs
- A wide range of accessories and shelving creating workspace and storage
- Dynamic and flexible solutions that meet the requirements of very specific industries
- An EU base enabling seamless movement and storage of product.

The Solution

- Sizeable premise for the distribution of parts and also manufacturing facility with sales office
- The facility had to be within close reach of key customers who require quick delivery.

Key Achievements

- A facility up and running, resourced and fully equipped within two months
- A plant providing the solutions required by long standing European clients and brands.
