# Shade Sail Structures

## Product Overview

Our superb range of eye-catching custom made shade sail structures offer a great way of covering almost any shape or size of area. Specialising in the supply & installation of completely bespoke structures means that no area is either too large or too irregular in shape to be covered. Offering a superb colour range also means that your structure can be custom made to suit your own individual needs.

## Our shade sail product range includes:

Commercial 95 knitted shade-cloth - see page

Ferrari 502 satin all-weather fully waterproof P.V.C. Coated vinyl - see page

Steel powder coated or hot dipped galvanised structures

High quality structural grade tanalised timber structures (certain restrictions apply)

Special wall-mounting brackets

Stainless steel fittings to ensure a long & corrosion-free life

Bumper pads on all exposed posts - see page

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Gallery

# Fixed Canopy Structures

## Product Overview

Fixed canopy structures offer a permanent solution which allows for the coverage of huge outdoor areas. These are usually positioned adjacent to an existing building or structure but can also be installed free-standing in any suitable location. Fixed canopies can be manufactured to suit any length required up to a single projection of 6m.

### Our fixed canopy product range includes:

Triple-wall polycarbonate roof sheets offering a strong, durable long-life solution

Steel powder coated or hot dipped galvanised structures

Stainless steel fittings to ensure a long & corrosion-free life

Bumper pads on all exposed posts - see page

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Gallery

# Trent Canopy Structures

## Product Overview

Our Trent canopy structures have been specifically designed to offer a low-cost maintenance free solution to your outdoor shading problems. Our superb range of Trent canopy structures means that we are able to offer complete coverage of almost any size of area by joining structures. All gaps created between the structures are then closed with a flexible gutter joint to match the fabric roof.

## Our Trent canopy product range includes:

Commercial 95 knitted shade-cloth - see page

Ferrari 502 satin all-weather fully waterproof P.V.C. Coated vinyl - see page

Steel powder coated or hot dipped galvanised structures

High quality structural grade tanalised timber structures (certain restrictions apply)

Special wall-mounting brackets

Stainless steel fittings to ensure a long & corrosion-free life

Bumper pads on all exposed posts - see page

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Gallery

# Fixed Umbrella Structures

## Product Overview

Fixed umbrella structures are an ideal alternative when there is little available area to install structural support posts. Umbrellas can be joined to cover almost any area & the gaps created between the structures are then closed with a flexible gutter joint to match the fabric roof. The steelwork support frame, the umbrella fabric & the bumper pads can be supplied in multiple colours to create a superb eye-catching finished product

## Our fixed umbrella product range includes:

Commercial 95 knitted shade-cloth - see page

Ferrari 502 satin all-weather fully waterproof P.V.C. Coated vinyl - see page

Steel powder coated or hot dipped galvanised structures

Special wall-mounting brackets

Stainless steel fittings to ensure a long & corrosion-free life

Bumper pads on all exposed posts - see page

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Gallery

# Folding Umbrella Structures

## Product Overview

Folding umbrellas offer a low cost, versatile alternative to other types of structure. The structures are available with many different support type options & are complimented by a huge fabric range. The main advantage of folding umbrellas is that they can be folded down & covered when not in use.

### Our folding umbrella product range includes:

High quality aluminium powder coated finish on all exposed parts

Many different shape, size & support options available

Permanent or temporary support options

Leak-proof gutter joints are available for all umbrellas

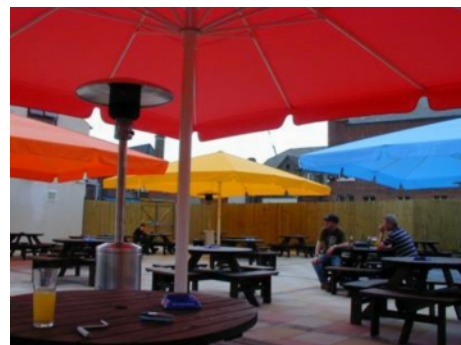

Over 100 different fabric options

Fire retardant fabrics available (certain restrictions apply)

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Gallery

# Retractable Awnings

## Product Overview

Retractable awnings are an ideal solution where a permanent canopy structure cannot be installed. Our awnings are available in lengths of up to 10m or can be combined to offer shade to almost any length required. Our awnings are also available with a standard projection of 3m but special awnings can be supplied with a 4m projection (certain restrictions apply). All awnings can be bolted directly to a building structure or can be supported on an independent steel frame. All awnings can be supplied with either manual or electric operation (certain restrictions apply).

## Our retractable awning product range includes:

High quality aluminium powder coated finish on all exposed parts

Tilting / folding awning support arms

Permanent or temporary support options

Low installation depth of finished awnings

Large selection of fabric types & colours

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Gallery

# Fixed Star Structures

## Product Overview

Fixed umbrella structures are an ideal alternative when there is little available area to install structural support posts. Based on the design of the fixed umbrella structure this design has a flat fabric canopy which is angled on the framework & offers a striking aesthetically pleasing finished product.

### Our fixed star product range includes:

Commercial 95 knitted shade-cloth - see page

Ferrari 502 satin all-weather fully waterproof P.V.C. Coated vinyl - see page

Steel powder coated or hot dipped galvanised structures

Special wall-mounting brackets

Stainless steel fittings to ensure a long & corrosion-free life

Bumper pads on all exposed posts - see page

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Gallery

# Multi-Pitch Sail Structures

## Product Overview

Multi-pitch structures offer a cost effective way of covering almost any shape or size of area. Specialising in the supply & installation of completely bespoke structures means that no area is either too large or too irregular in shape to be covered. Offering a superb colour range also means that your structure can be custom made to suit your own individual needs.

## Our multi-pitch sail product range includes:

Commercial 95 knitted shade-cloth - see page

Ferrari 502 satin all-weather fully waterproof P.V.C. Coated vinyl - see page

Steel powder coated or hot dipped galvanised structures

High quality structural grade tanalised timber structures (certain restrictions apply)

Special wall-mounting brackets

Stainless steel fittings to ensure a long & corrosion-free life

Bumper pads on all exposed posts - see page

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Gallery

## Product Overview

Conical structures are specifically designed to cover a large area with a single fabric canopy. Having multiple perimeter support posts & a single central support post means that we can cover a larger single area than with any other type of structure thus offering many possibilities for continued outdoor use.

## Our conical sail product range includes:

Commercial 95 knitted shade-cloth - see page

Ferrari 502 satin all-weather fully waterproof P.V.C. Coated vinyl - see page

Steel powder coated or hot dipped galvanised structures

High quality structural grade tanalised timber structures (certain restrictions apply)

Special wall-mounting brackets

Stainless steel fittings to ensure a long & corrosion-free life

Bumper pads on all exposed posts - see page

Method statements & risk assessments. Public liability insurance held as standard

Handover certificates & maintenance instructions are all included

## Commercial 95

Commercial 95 is a wide width heavy duty HDPE shade fabric, available in 16 popular colours. The lock stitch knitted monofilament construction is designed to block out up to 98% of UV rays, whilst allowing heat to escape through. Being very porous, it can span large areas with little or no fall, without the risk of water pooling.

Weight	Width	Seams	Waterproof	Fire Retardant	Warranty
340 gsm	3m	Stitched	No	No	10 years

Aquatic Blue 444938	Black 444945	Brunswick Green 444952	Cayenne 455255	Charcoal 444969	Cherry Red 444976
Deep Ochre 444990	Desert Sand 444983	Gun Metal 455262	Natural 445003	Navy Blue 445010	Rivergum Green 445027
	Sky Blue 445034	Steel Grey 445041	Turquoise 445065	Yellow 445072	

## Ferrari Précontraint 502 Satin

502 is a premium grade Type I PVC available in 40 designer colours. Its technical production method means that it is lightweight, strong, balanced and stable, meaning it is ideal for exterior tensile membranes.

Weight	Width	Seams	Waterproof	Fire Retardant	Warranty

## Technical Characteristics

Galvanized, oven-glazed, steel structure offering maximum protection against corrosion  
Translucent PVC membrane for natural luminosity and resistance against extreme winds

## Safety & Standards

The construction of our structures requires compliance to the highest standards of health & safety. All Texabri installations comply with current health & safety legislation and meet the specific E.U. regulations for Big Tops, Tents and Structures and NV65.

## Design, Manufacturing & Installation

Our design & installation engineers are highly skilled with proven experience to ensure a trouble-free installation.

## An Active Quality Policy

Texabri is ISO 9001 certified. This certification is a standard relating to the quality management system enabling the processes of an organization to be managed in order to supply products and services conform to customer requirements and applicable regulations.

## An Environment-Friendly Company

TEXABRI structures integrate perfectly in our sustainable development policy, The main components of our structures, steel frameworks and PVC membranes are 100% recyclable and contribute to the preservation of the planet.

## Texabri Stretched Canvas Shelters

For your covered outside areas regardless of the technical, environmental or budgetary specifications, we will always offer you the best solution: the one that meets your needs!

### Canvas Specification

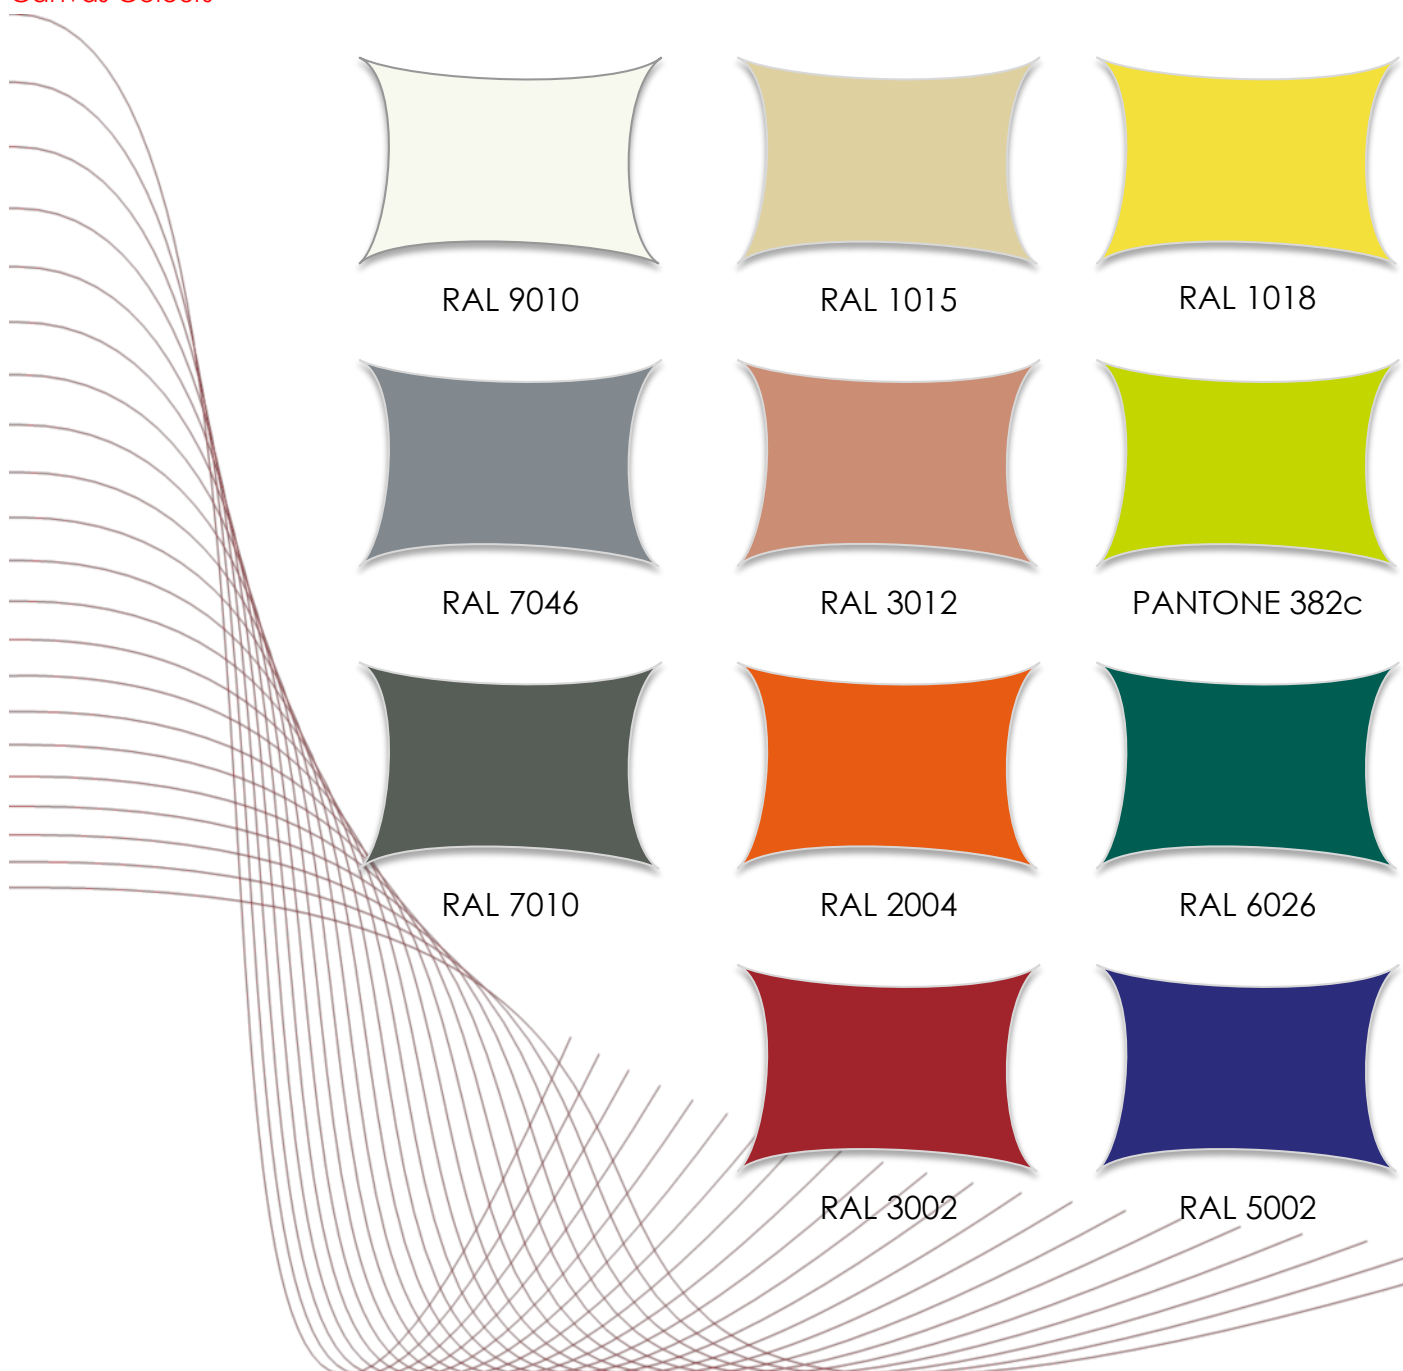

A Flexible 100% polyester weave fabric, coated on both sides with PVC and varnish (acrylic varnish). The canvas is treated to resist UV degradation & is available in 9 colours.

Surface density: 650 g / m<sup>2</sup>. Thickness: 0.4 mm

Appearance: Smooth face satin matt on top side with plain white underside

Fire Retardant to M2 classification

### Canvas Colours

## Texabri Stretched Canvas Shelters

### Advantages & benefits

- Self-supporting steel framework
- Durable thermo-lacquered galvanised structure
- U.V. resistant, waterproof tensile fabric canopy
- Canopy installation – 1 day per canopy
- More than 60 standard sizes available along with hundreds of custom made sizes

### Available options

- Internal lighting systems
- Customised printed logos & decals
- 50mm thick padded Post Protectors
- Safety protection grid for lighting systems
- Guttering with water boxes
- Rigid or canvas partitioning
- Ø800mm above ground concrete plinth
