

Project Summary

Launch of the Duraflow DF2 Product Range.

Challenge

- To build on Flowstore's already highly successful products – the Duraflow and the LS2 – amalgamating these into a superior product.

Why Flowstore

- The ability to design bespoke solutions to meet client needs
- A wide range of accessories and shelving, creating workspace and storage
- The availability of specialist coatings for clinical areas enabling effective cleaning and resistance to bacteria
- Flexible solutions that meet the needs of very specific industries.

The Solution

- A cost-effective solution for converting existing pallet racking to a carton flow system.
- A carton live storage product that converts most brands of pallet racks and long -span shelving systems into carton flow racks, whether double or single sided bays
- A market leading design that brings considerable advantages to material handling and storage.

Key Achievements

Product enhancements never before seen in the marketplace and currently unavailable elsewhere. These enhancements include:

- A denser wheel patten for improved rolling characteristics
- No requirement for lane reconfiguring to meet changing carton or container sizes
- The provision of lane divider guide options never previously available
- The automatic presentation of first in, first off (FIFO) as 'ready to pick', enabling shorter picking routes and faster pick rates.
