

# SINGLE GLAZED FRAMELESS PORCHES

Versatile, practical and ultra-modern frameless glass porches transform the front of your home. Protection, comfort and a design offering a discreet look or a bold statement feature. Suitable for any house style and entrance regardless of shape or size.

- ◆ Single doors, double doors, fixed glazed panels and frameless corners.
- ◆ Expertly installed into or around your existing entrance porch or creating a new one.
- ◆ Quality laminated or toughened safety glass improves security and visual access.
- ◆ No visible threshold improves access for you, your family and your visitors.
- ◆ Designed to enhance and accentuate period front doors and feature porches.

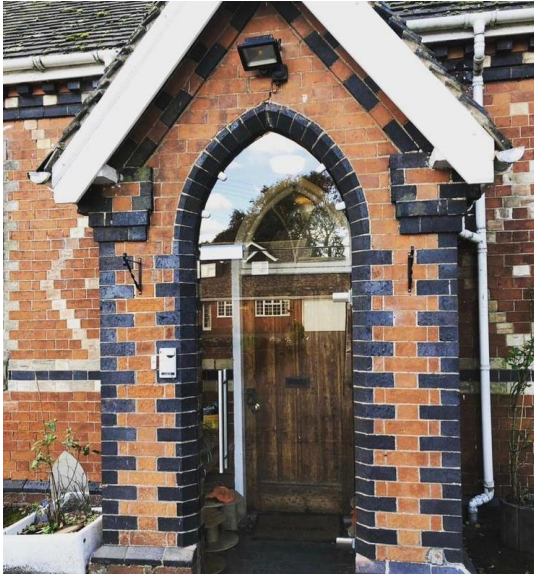

You can create either internal or external porches. Built to your exact requirements, create a contemporary exterior porch or internal lobby. Fully enclosed, dry, practical and helps retain heat in your hallway.

You can choose the function of your porch. Frameless glass doors come with a choice of glass-mounted hinges or the latest hidden hydraulic door closer fixed in the porch floor for controlled, soft opening and closing.

Doors open in, out or even both ways. Choose from soft-close and self-closing devices. And with no threshold at all, they're easy to use, great for easy access and with no possible trip hazard.

# SINGLE GLAZED FRAMELESS PORCHES

FGC frameless glass porches use the best in glass technology and contemporary metal fittings. Slimmer, more modern, discreet and without the bulk of aluminium, timber or PVCU porches.

Expertly crafted and with impeccable quality, our frameless glass porches give your home a transformational new look.

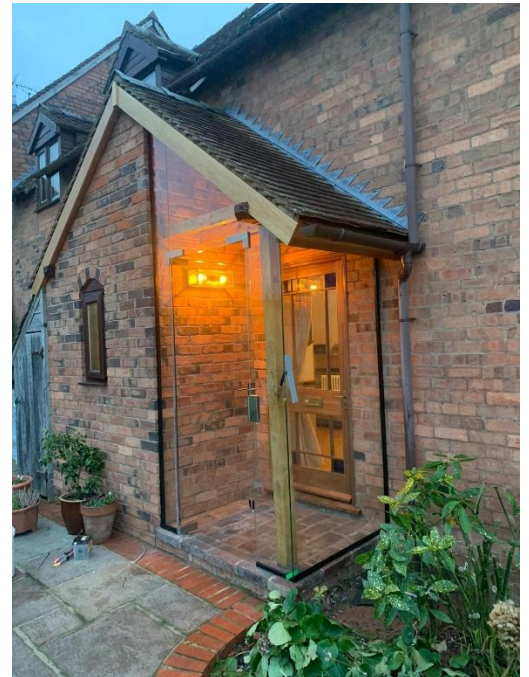

Welcome your family and visitors while retaining the character of your home.

With an all-glass design and minimal visible fixings, our glass porches are perfect in any style or age of property. Existing archways or alcoves benefit from an additional glassdoor offering an extra barrier and some protection from the elements.

Two or three-sided porches with screens or side returns give you added covered space and a modern glass box feature. Clarity, vision and a beautiful new glass structure at the front of your home.

Fully bespoke, we craft our porches to fit into your existing structure. We can even shape the glass around curves, shapes or feature brickwork or stone. Locks and hinges are meticulously fitted to the toughened or laminated safety glass.

Personalise your new porch with elegant handles, and even a letterbox cut into the toughened or laminated glass. You also benefit from improved security and extra covered space.

Great design offers you desirable edge-to-edge glazing or option surround frame in satin or polished metal and powder coated colour.

Without the full frame of other types of porches, they're perfect for showcasing rather than obscuring your period or feature front door.
