

# BRAND NEW V16 VARIANTS

## V16 Lumi-Level®

Displays the remaining tank water level in litres on the new V16 controller.

## V16 DI Saver

Has the same features as the Auto Fill+Flush and sends the post flush high TDS water to drain to prolong DI resin life.

## V16 Flowmeter

Indicates the real world flow rate (litres per minute) and displays the accumulated water use (with reset).

# V16 VARIANTS

All the new features of the V16 Basic, plus...

## V16 WFP Link®

Long range radio remote control of the system. The phone app, fob (remote) and controller all work together.

## V16 Charger

Charges the leisure battery whilst the vehicle engine is running, protecting the battery from discharging too much.

## V16 Hot Water

Controls the water heating system to stop the system freezing over night as well as indicating the temperature.

## V16 TDS

Monitors and measures the TDS value and warns when TDS is too high to clean with.

## V16 Auto Fill

Automatically fills the tank. It has two filling settings one time fill or fill on demand.

## V16 Auto Fill+Flush

Automatically fills the tank and flushes the membrane to prolong the life of the filters.

**Pick n mix your controller functions, available in any combination when requested.**
