

UPGRADE TO THE NEW V16 AND V16 HC CONTROLLERS*

NOW WITH:

PumpSmooth™

The advanced pump drive system runs the pump much more smoothly and quietly, and extends its life. With the V16 pumps can be driven slower, faster and harder than ever before.

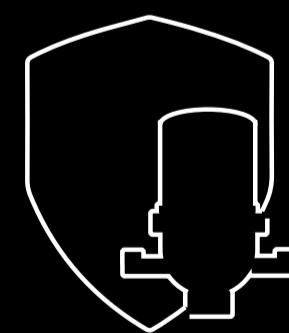

PolarityProtect™

This feature means that the V16 will not be damaged if it is wired incorrectly; it simply will not work. Once it has been wired correctly, the unit will recover and work normally. (Applies to V16 only.)

PumpPrecision™

Thanks to the new pump control technology*, the pump is monitored with far greater precision, saving water and energy, and offering faster and more accurate dead end detection.

PumpProtect™

Incorporating features such as dead end detection, pressure switch shutdown, over-current detection and short-circuit detection, the V16 protects the whole system and helps save power and water.

Available with the V16 branded black and gold label. Customised labels available on request (additional design and print fee will apply). 2 year warranty on all Spring controllers and Spring customer support with every order. The V16 and V16 HC ranges include: Basic, Charger, Auto Fill, Auto Fill+Flush, Hot Water, TDS and the WFP Link®. Units shipping from 01/07/20.
