Elephant Curved Bench: W550mm, L1280mm, H450mm

### Production

Stonecrete Garden Furniture is made from a unique mix of white concrete resulting in a natural cream stone frost/weatherproof finish.

If the cream stone look isn't quite your style, you can have a choice of textured colour finishes (Marble Green or Bronze) which are also fully frost/weatherproof.

All benches are reinforced with steel bars. We put maximum effort into ensuring that your bench is made to the highest standard.

### Construction

Our Benches and Tables are delivered in multiple parts.

They are designed to be a permanent feature and therefore parts should be fixed together using either a strong mortar mix for the natural stone finish (3 parts sand to 1 part cement - white cement for colour consistency - this can be purchased at your nearest builders merchant.) or a high strength adhesive (found at any DIY store) for the coloured finish.
