

## LORIEN ENGINEERING SOLUTIONS PRESS RELEASE

Document reference: 116\_49880

Document alias: Love it! Food packer, Marmite story

### Love it!

Project management specialist Lorien Engineering Solutions (Tel: 0870 600 7733) has been chosen by Unilever UK foods to lead a six phase redevelopment at the Marmite factory in Burton-upon-Trent.

Lorien, based in Lichfield, is acting a project management partner on a €10m refurbishment, which itself is part of a wider three year redevelopment at the site.

The six phase stage includes refurbishment of existing infrastructure and the installation of automated systems, replacing equipment which in some cases, is more than 45 years old. Among the latest installations is a 22 metre high evaporator.

Lorien Project Manager Antony Carter said: "One of the most challenging aspects of the project is the logistics of ensuring that production continues uninterrupted whilst new equipment is bought on stream."

The sixth and final phase of the refurbishment is due for completion in June 2006.
