

fabric face lightbox

Fluorescent Illumination

When budget and size is an issue, our Fluorescent Illumination fabric light boxes provide the same impact as the LED version, and at just 140mm deep can be built to almost any size. They can easily be built in manageable sections for ease of transport and assembly, and cool white tubes and electronic gear trays provide an even distribution of light.

Ideal for any market where high impact, easy to change and cost effective graphics are of major importance.
