

RYDLYME

The World's Leading Biodegradable Cleaning Agent

RYDLYME is a scientifically formulated descaler specifically designed to dissolve the toughest water scale, lime, mud and rust deposits from virtually any piece of water-based equipment. It is an innovative and unique solution that dissolves deposits into solution.

This powerful, yet totally safe, liquid descaler is non-flammable, non-hazardous, non-corrosive and non-injurious; so *RYDLYME* will not harm your personnel, equipment or our environment!

RYDLYME has been tested and proven to be biodegradable, so disposal is not a problem. Even in concentrate (as received) form; it can be flushed down normal plant sewers.

RYDLYME has been used for the effective cleaning of air compressors, boilers, chillers, condensers, cooling towers, and heat exchangers. The solution is easy to use as it is added directly to your equipment through fouled water passages and circulated by a portable pump.

RYDLYME will effectively dissolve hard water deposits safely, quickly, economically and without the need to disassemble your equipment.

Improve your equipments efficiency today.

- ***RYDLYME* is Effective!**
It dissolves approximately 1kg of scale per 4L
- ***RYDLYME* is Fast!**
It will dissolve inefficiencies away in a matter of hours
- ***RYDLYME* is Safe!**
It can be held in the open hand without injury
- ***RYDLYME* is Biodegradable!**
It has a biochemical oxygen demand of 16mg/l and can be disposed of through normal sewers

IS THE SOLUTION!
