Numatic Sanitise PRO

A high-pressure misting disinfection system, the NSU370 Sanitise Pro delivers 99.999% efficiency in inactivating and destroying pathogens.

Using the TECcare Control Disinfectant Solution, the NSU370 produces a consistent dispersion pattern for reliable disinfection results. Even distribution increases coverage performance whilst also drying in under 10 minutes. The high-pressure mist creates a vortex effect, delivering a combination of excellent antimicrobial properties with unparalleled non-corrosive performance, for increased coverage across surfaces and touchpoints. The NSU370 is designed and engineered for extended use in commercial environments, such as schools, workplaces and hospitality, boasting an easy to fill "no spills" tank and being compact to store.
