PVC DOORSTRIP

PVC curtains

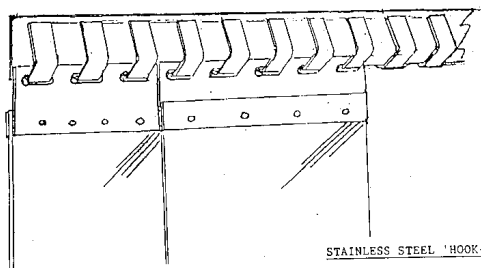

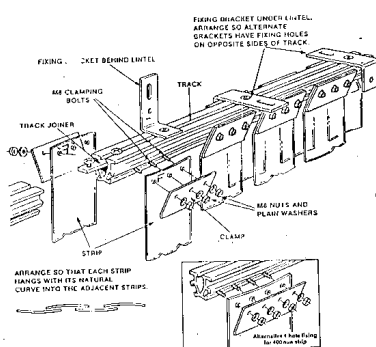

save energy by keeping the cold at bay

In summer and winter, external PVC curtains keep your buildings at the temperature you choose. Whether you want to keep heat in or out, our curtains will make a clear difference to your heating or air-conditioning costs.

PVC strip is the safe and simple solution to the problem of constant pedestrian and motor traffic. Perfect two-way vision satisfies safety considerations while the cost can usually be recouped in a single winter. When the outside metal door is closed, the savings are even greater thanks to the double-glazing effect which can halve the door's heat loss.

Aluminium Twin Track Hanging System

- * Ideal for the food industry, cold stores or any wet or health conscious environments.
- * Can be fixed either behind or under the lintel.
- * Each strip is attached with its own stainless steel plates and the overlap is infinitely adjustable.

We supply PVC doorstrip in both general purpose & freezer grades in clear & colours. A ribbed version is available for heavy wear areas.

Stainless Steel hook on suspension system for food areas & Aluminium twintrack for general applications.

Standard sizes :-

- 200mm x 2mm
- 300mm x 2mm
- 300mm x 3mm
- 400mm x 4mm

Supplied in 50 metre rolls.

Cut lengths & full kits also supplied.
