

ultra lightpanel

LED Lightpanel

Designed and manufactured in the UK, our Ultra Lightpanel combines the latest LED technology and our unique engraving patterns, producing bright even illumination across the entire panel.

Our Ultra panels are available in a range of colour temperatures 6500k, 5000k, 3800k and 2800k and in single colours of red, green, blue. Driven by a 24 volt system we also manufacture RGB panels which can either have simple dimmers or programmable DMX controllers to drive and sequence the panels.

With a maximum size of 3m x 2m suitable applications include; decorative glass light walls, architectural lighting, ultra bright and larger light boxes or interior design such as lit reception desks or glowing kitchen splash-backs, the possibilities are endless.
