RESPIRATORY PROTECTION MADE CLEAR

RESPIRATORY PROTECTION

Avit disposable respirators are classified as FFP1 NR or FFP2 NR and offer different levels of protection. The higher the number within the classification, the more protection the respirator will provide.

The level of protection is incremental, so an FFP2 respirator will offer exactly the same protection as an FFP1, plus additional protection on top.

STANDARD DISPOSABLE RESPIRATORS

Standard disposable respirators do not have a valve. They are suitable for use in normal conditions, i.e. for activities requiring minimal effort and physical activity.

PREMIUM DISPOSABLE RESPIRATORS

Featuring a valve which makes it easier to exhale, these respirators are suitable for activities requiring greater physical effort and for working in confined spaces.

PREMIUM DISPOSABLE CHARCOAL RESPIRATORS

Designed to provide protection from nuisance household odours, charcoal disposable respirators are suitable for most decorating tasks, i.e. brush/roller application of most domestic paints and varnish. The valve allows easier breathing and is, therefore, suitable for activities requiring greater physical effort.

APPLICATION GUIDE

P1 →

HOW TO FIT

First pull the lower strap over your head and onto the back of your neck, below your ears. Then pull the top strap over your head and position above your ears.

Gently push down on either side of the metal nose strip, ensuring it moulds snugly to the shape of your nose.

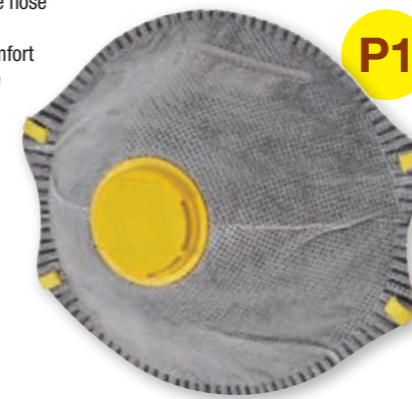

APPLICATION GUIDE
