

### **Period Home Renovation — The North East**

The client lived near to our showroom in Macclesfield and were renovating a property in the North East where they were moving to. We supplied the door for their builder to install because of the distance involved.

The door is our top of the range engineered timber product with the SP timber capped frame in a white finish which contrasts with the black door blade. The glass is our premier bevelled collection design with contrasting red colour in the corners. The client also asked us to fit a centre door knob and doctors knocker to give a true period feel.

The end result is impressive and the client ordered a second door for the rear of the property. Even the postman is pleased with the new door! As a thank you the client came into the showroom in December with a Christmas gift and a thank you card.
