

# Smart Packaging Solutions for Medical Market...

## Custom-made solutions

Starting from the initial concept, to creation of prototypes and finally to the complete printed packaging, we can develop your own special packaging requirement to help you bring your product successfully to market.

Whether by hot-foil, silk screen or tampon printing, labeling or embossed with brand name/logo – rose plastic packaging lends itself exceptionally well to your advertising message.

## Numerous applications

Packaging examples of use:

- surgical and medical instruments (mallets, rasps, spoons, curettes etc.)
- sales and promotional packaging for hygiene and cosmetic items
- aids and accessories for medical technicians • implants and implant inserters
- medical bone screws, mails, drills, sheets... • syringes, pipettes, thermometers ...
- pharmaceutical products • precision parts and components
- medical measuring instrumentations etc.
