Writing instruments and stationery

Strong packaging, strong impression!

There never is a 2nd chance for the 1st impression...

There are high demands from the market: Safety and protection for the packed product, attractive shape and design for optimum sales support as well as re-usability and alternative use-possibilities are some of the features expected.

Following you will find a selection of possibilities rose plastic offers:

Numerous applications

Packaging examples of use:

- Writing, drawing and painting implements
- School and office supplies
- Artist and hobby supplies
- Drawings, drafts and blueprints
- Postal and storage tubes
- accessories like indian ink, rubbers and sharpeners

Custom Made Solutions

Starting from the initial concept, a closely coordinated network of part and mold design, mold construction, manufacturing and secondary operations like printing is perfected to provide the customer with their desired package.

The development of individual packaging solutions is one of our strengths.
