

# Bramfield

## Outdoor Furniture

The Bramfield 1.8 metre bench offers something a little more ornate than the classic English bench style. The main facing rails, together with the vertical back slats are beautifully shaped to create pleasing aesthetic design features. As with all our furniture the build quality is excellent and the Bramfield is designed to be ideal for both private and public use.

## Dimensions

BL/BRAM18 – 1.83m

The Bramfield is produced from Iroko (*Chlorophora excelsa*) that is sourced from West Africa. This is a highly durable hardwood with an attractive grain that will withstand our weather all year round.

The timber remains in its natural form with principal end grain waxed.

We are particularly careful to buy our timber from countries belonging to the International Tropical Timber Organisation, all of which have accepted ITTO guidelines for the sustainable production of tropical timber.

By purchasing our products it ensures that the timber resource retains an economic value, thus providing an incentive to replant, manage and protect for the future.

## Inscriptions

Either machine carved inscriptions or plaques in lacquered brass or stainless steel will enhance our full range of seating.

This may simply denote ownership or make the seats ideal for presentation and commemorative purposes.
