

# Installation Examples

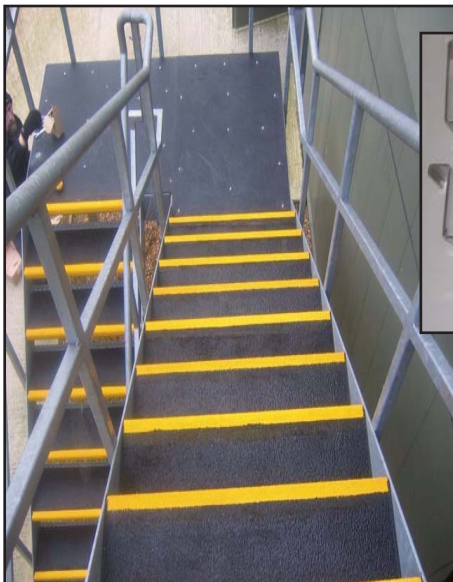

These pictures show examples of fibreglass grating installations. Fibreglass grating has the added advantage of quick and easy installation on site.

We stock a wide range of gratings in various depths and colours to cater for any eventuality.

Using our fibreglass structural pultruded profiles, it is possible to build just about any structure on site with ease. This includes platforms, ramps, ladders, walkways, mezzanine flooring etc. We stock a wide range of profiles.

We stock a wide range of safety and access equipment and materials including gratings, pultruded profiles, safety gates, solid plate, covered surface gratings, handrail systems, stainless steel fixings, spill containment drum bunds etc.
