Thermo Transfer Print & Vinyl Labels

Thermo Transfer Print

Thermal transfer print is a high-quality well-presented branding option that will leave a lasting impression on your clients and their guests. A permanent and durable print is made directly on to the box using thermal technology, suitable for dishwashing & conveyor washing. Our thermal transfer print can be applied to all types of boxes and crates, used widely by caterers, event hire & glass loan companies. Look professional and prevent your boxes from being misplaced, getting mixed up or going walkabout. In addition to identifying your belongings, your branded boxes will continue to promote your business.

Print suitable for:

- Solid Euro Containers
- Solid Euro Cases
- Euro Container Lids
- Ventilated Euro Crates
- Conveyor Racks
- Dishwasher Racks
- Attached Lid Containers
- Crockery Transport Boxes

Thermo Transfer Print Options

- Logo printing
- Text/Number printing
- Bar Code printing
- QR Code printing
- Black or White printing
- Colour printing

Vinyl Labels

Personalising your storage boxes and other belongings is easy with our in-house vinyl print service. High tack vinyl labels can be applied to most surfaces, including plastic, wood & metal. Using a state of the art Rowland printer, we can print and cut any shape, size and colour label to suit your needs. Great for personalising storage boxes and other equipment, as well as creating an eye-catching, professional look that you and your customers will love.

Suitable for use on:

- Correx Boxes
- Correx Box Lids
- Bespoke Storage Boxes
- Solid Euro Containers
- Solid Euro Cases
- Euro Container Lids
- Ventilated Euro Crates
- Attached Lid Containers
- Crockery Transport Boxes

AVAILABLE TO PURCHASE SEPARATELY

NO SET UP FEES

Rack Cart with two push bar, removable drip trays and two brakes.

Efficient Storage

We stock an extensive range of boxes with most ranges offering a different height for every 15mm that's 1.5cm! In hand with this our box dividers are just as extensive helping you get as many glasses in a box as possible. Less boxes are needed freeing up unnecessary occupied storage space.

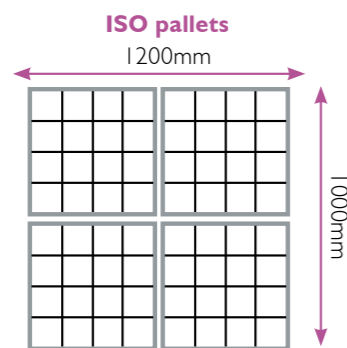

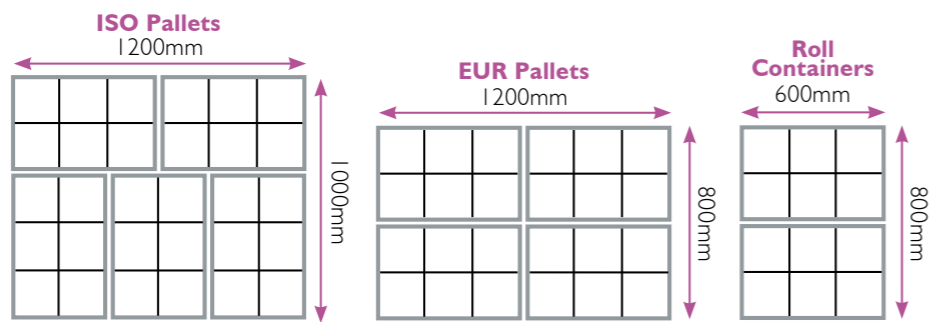

Palletisation

Suitable for 600 x 400mm Boxes and Racks

Suitable for 500 x 500mm Dishwasher Racks

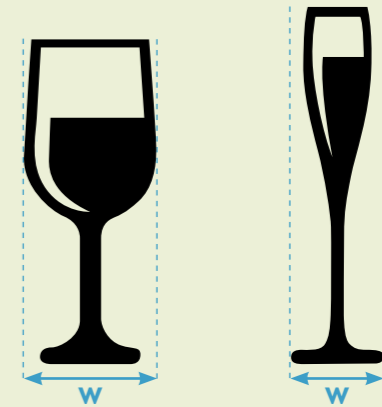

We know how important it is to be economical with glass and chinaware storage and transportation, that's why all our storage boxes are of European standard sizes make logistics a breeze.

Glass Measurement Guide

Step 1. Measure the height of the glass.

Step 2. Measure the width of the glass at the widest point.

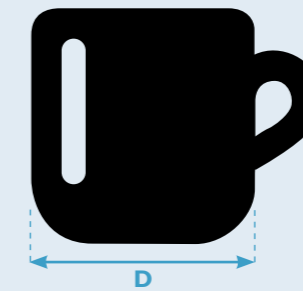

Cup Measurement Guide

Step 1. Measure the height of the cup.

Step 2. Measure the diameter of the cup

Step 3. Measure the width of the cup including the handle.

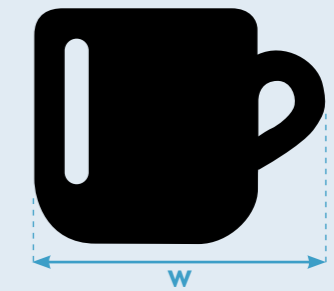

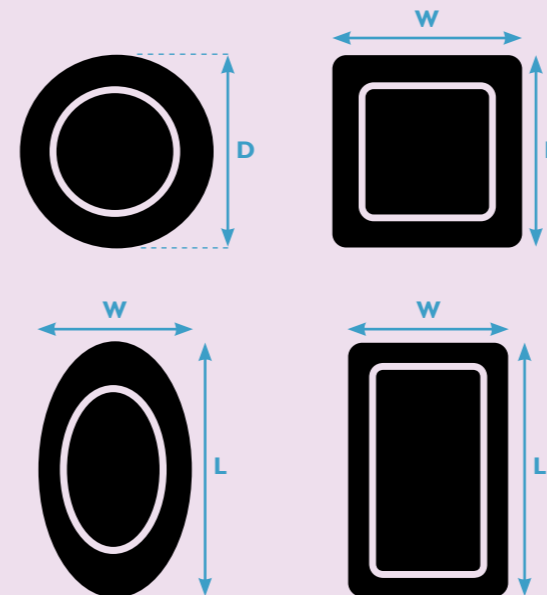

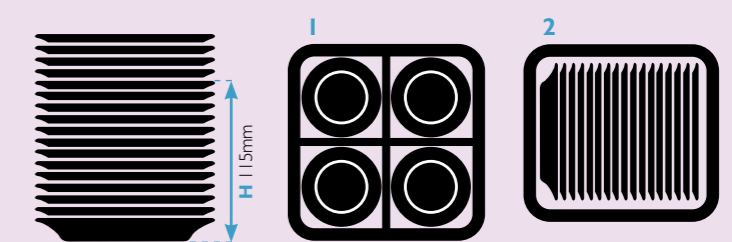

Plate Measurement Guide

Step 1. Measure the diameter on circular plates or the length and width on other plates.

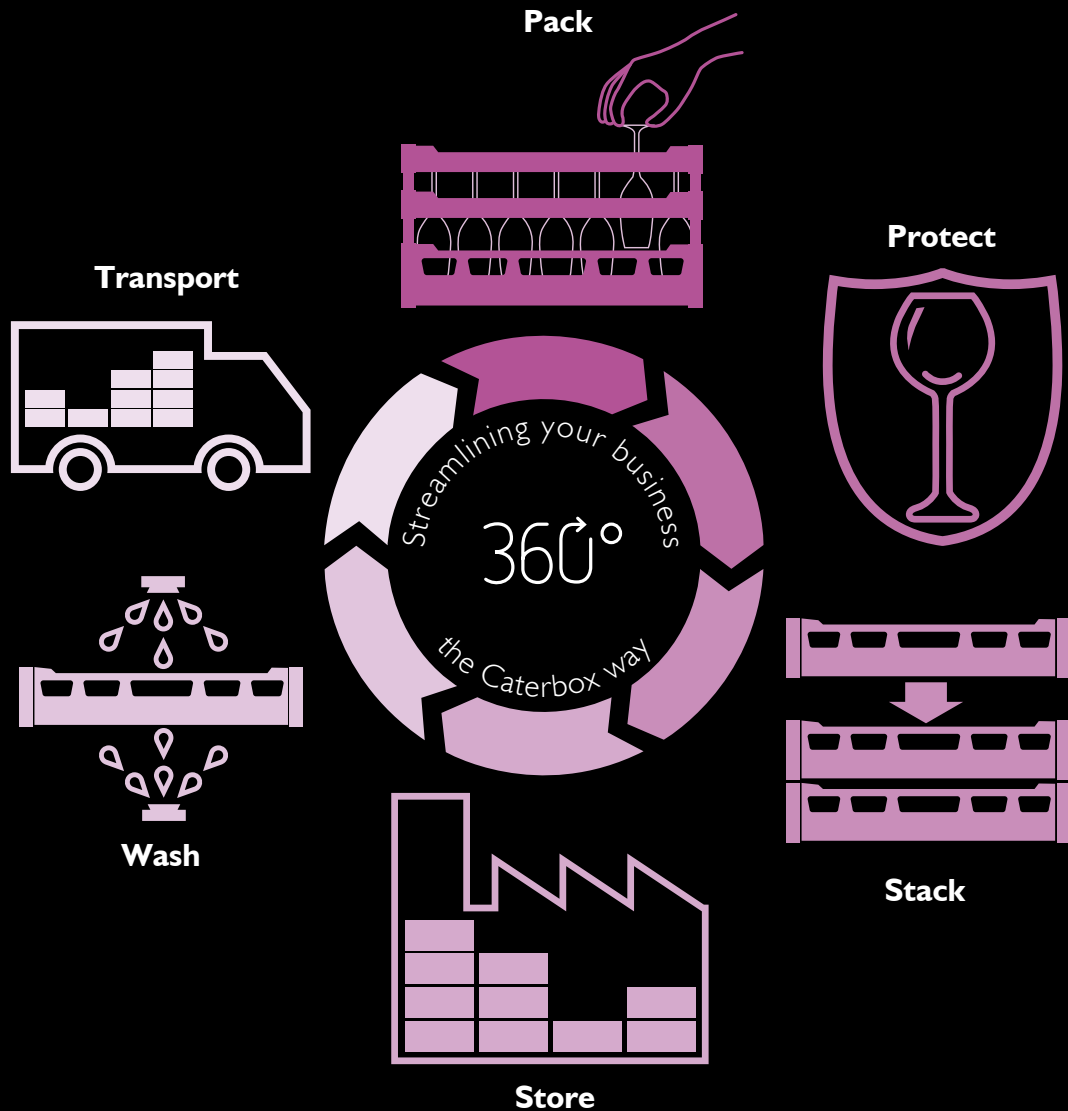

Step 2. To find out the box capacity, take note of the internal space available and how the plates can be stored in your chosen box.

Example 1
This box stores plates flat. Take note of the internal height of the compartment, then measure a stack of plates up to that point. Multiply the number of plates by the number of compartments of the box.
For example, the compartment is 115mm high, measure a stack of plates up to 115mm, counting the plates below this point. Then multiply that number by the 4 compartments.

Example 2
This box stores plates on the rim lengthways. Take note of the internal length of the box, then measure a stack of plates up to that point.
NOTE: Some boxes store plates widthways so the internal width will be needed.
