

CS80 Spring Steel

Hardened & Tempered / Annealed

CS80 spring steel strip, sheet and plate

CS80 spring steel stockholders and suppliers, delivering throughout the UK.

West Yorkshire Steel are CS80 spring steel suppliers and stockholders of sheet, strip and plate conforming to BS1449 and BS5770 designations. This grade is a carbon spring steel with an average carbon content of 0.80%. When supplied in coil it can be cut and slit to your requirements. It is common for CS80 strip to be supplied with a polished surface finish; this is achieved by a fine grinding, abrasive brushing or other similar process. With this polished finish CS80 strip is supplied with dressed edges or sheared to your required width. For spring applications it is recommended that CS80 is used in the hardened and tempered condition. CS80 annealed spring steel is supplied in plate, sheet and strip.
